The project

Context

Let's entrepreneur together! It is a project that seeks to investigate the current society and the opportunities that the current crisis will bring about in the creation and implementation of future projects . We aim to analyse the different realities youth generations live in relation to education and the labour market. The project will develop a program full of activities with non-formal content and dynamics open to informal learning with methods such as: Energizers, debates, presentations, role plays, simulations, brainstorming, group work, exercises, excursions and much more.

Objectives

1. To encourage non-traditional learning methods, as well as both group communication (teamwork) and individual communication (interactive presentations).
2. To improve the resources of young participants in the practice of public communication, negotiation, persuasion and self-esteem.
3. To create 4 detailed action plans of 4 business ideas and 4 videos describing the stages. (Learning to undertake, from idea to project, develop your project and defend the project in public),
4. To promote a sense of civic responsibility and social inclusion towards the minorities that live with us.
5. To promote personal development of youth at the local, national and European levels

Activities

The main purpose of this Youth Exchange is to practice and put into context all the steps of an entrepreneurial mindset. For this reason we will play with mock enterprises, we will learn the 4 steps of the business plan from the idea to the public presentation, we will visit creative design spaces, good practices, experienced entrepreneurs. We will practice key skills needed to come up with functional ideas and implement them successfully. Finally, we will share lines of funding and opportunities to develop in real life the best prototype of the ones worked during the project.

Building community, sharing cultures, learning from other experiences, excursions, self development activities, sports and playing and exploring new ways of learning will surround of course every day of the project.
